## **Village of Brandon**

### **NOTICE**

The Village of Brandon Utility Department pumped 18,000 gallons of “clear rainwater” from sanitary piping to storm sewer piping for 2 hours on Wednesday, October 2, 2019.

This is a notification to all residents that this had no effect on the water supply or anyone’s safety.

This procedure is considered a by-pass to relieve pressure on our infrastructure due to heavy rains.

Please contact Vance Henning at 346-5492 with any questions.
